

Machine Mounted Displays

MMD9000 series

Stainless steel monitor solution for hygienic environments

NEW

Machine Mounted Displays **Stainless steel monitor for use in the food, beverage, pharmaceutical and chemical industries**

Fully closed stainless steel housing, without screws and edges, optimised for high hygienic requirements: The new display of ADS-TEC has been developed and designed for machine and system operation in sensitive hygiene environments.

HIGHLIGHTS

- Easy to clean glass and stainless steel surfaces
- Capacitive multi-touch display in 15.6" Full HD
- Three different mounting options
- Fully closed stainless steel housing
- IP69K protection against dust and water jet

Easy to assemble **Flexible mounting concept**

- Three mounting options are available:
 - » Direct mounting (with optional spacer)
 - » VESA adapter
 - » Rotatable tube adapter for 48 mm support arm systems
- Foot or support arm mounting optional
- Horizontal or vertical alignment possible
- Compact design for convenient usage

Easy to clean **Optimised for stringent hygiene requirements**

- Standard cleaning agents can be used
- Easy to wipe and clean
- Preventing dirt and bacteria thanks to a screwless design without joints and edges
